**SUBJECT: ENERGY MANAGEMENT CONSERVATION**

As the Board of Education of the Vestal Central School District, we believe it to be our responsibility to ensure that every effort is made to conserve energy and natural resources while exercising sound financial management.

The implementation of this policy is the joint responsibility of the board members, administrators, teachers, students, and support personnel, and its success is based on cooperation at all levels.

The district will maintain accurate records of energy consumption and cost of energy and will provide information to the local media on the goals and progress of the energy conservation program.

The principal will be accountable for energy management on his/her campus with energy audits being conducted and conservation program outlines being updated. Judicious use of the various energy systems of each campus will be the joint responsibility of the principal and head custodian to ensure that an efficient energy posture is maintained on a daily basis.

Curriculum will be developed to ensure that every student will participate in the energy management program in the district as an "energy saver".
