SUBJECT: IDENTIFICATION AND REFERRAL OF SEXUALLY AGGRESSIVE YOUTH

In its continuing effort to maintain a safe environment for our students, the Board of Education believes that sexual abuse by children and adolescents is a school and community problem. Protection of the school and community through the prevention of sexual abuse is a high priority. Cooperative efforts with the police, the Department of Social Service and area counseling agencies are vital. The Board of Education further believes that ongoing staff inservice is important in this effort. The Superintendent of Schools/designee will establish guidelines and procedures to implement this policy.
