

**Definitions and resources**

**Isolation:** Avoiding contact with others, including those you live with, because you know they are sick. Reporting your positive test result to Broome County Health Department will allow us to issue you your isolation orders

**Quarantine:** Avoiding contact with others, including those you live with, because you are at risk of developing COVID-19 following contact with someone who had it. New York State and Broome County Health Department are no longer issuing quarantine orders. An attestation form for schools and workplaces can be obtained at the link below.

**Well-fitting mask:** A well-fitting mask is one that covers the mouth and nose, should fit snugly with no gaps. Children under 2 years old should not be wearing masks. Cases and contacts under 5 years old who attend daycare should be excluding for 10 days due to the difficulty on enforcing masking in this setting.

**K-12 school:** A building which houses schools for grades K-12. Students and staff in pre-kindergarten programs located within K-12 school buildings should follow K-12 guidance.

**Fully vaccinated:** A person is considered fully vaccinated two weeks after they complete a primary series consisting of either two doses of Moderna, two doses of Pfizer, or one dose of Johnson & Johnson.

**Booster eligibility:** Boosters are recommended for everyone ages 12 and up and should be given at least two months following the first shot of Johnson & Johnson and at least five months following the second shot of Moderna or Pfizer. Consult with your primary care provider or pharmacist about eligibility.
