

## VCS D COVID-19 SYMPTOM FORM

Name:	DOB: / /	Time:
School:	Grade: <input type="checkbox"/> N/A	Date:
Teacher:		

Your child or a staff member screened positive for one or more of the following COVID-19 symptoms:

- A temperature greater than or equal to 100.0° F
- Feel feverish or have chills
- Cough
- Loss of taste or smell
- Fatigue/feeling of tiredness
- Sore throat
- Shortness of breath or trouble breathing
- Nausea, vomiting, diarrhea
- Muscle pain or body aches
- Headaches
- Nasal congestion/runny nose

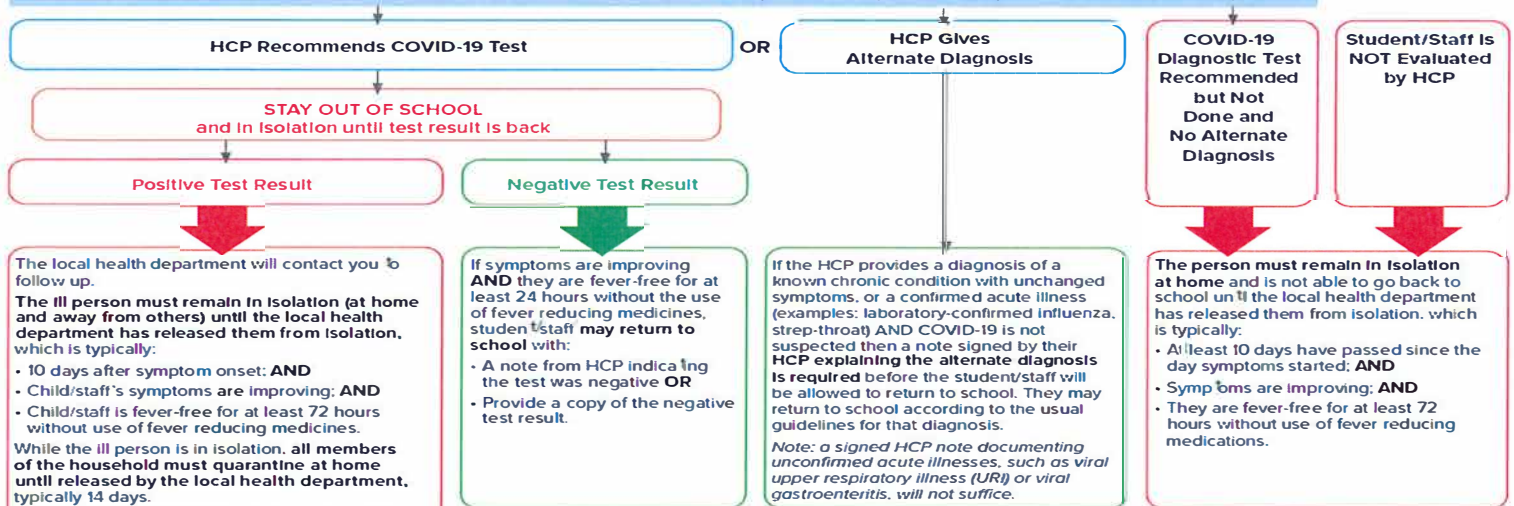

### COVID-19 Flowsheet for Student or Staff with COVID-19 Symptoms

#### Student/staff has symptoms consistent with COVID-19:

- Student/staff member should keep face mask on.
- Staff members should be sent home immediately.
- Students awaiting transport home by the parent/guardian must be isolated in a room or area separate from others, with a supervising adult present using appropriate personal protective equipment (PPE).
- School administration and the parent/guardian should be notified.

- Provide instructions that the individual must be seen by an HCP for evaluation and have COVID-19 testing (unless determined not necessary by HCP). If they do not have an HCP they should call their local health department.
- Schools should provide a list of local COVID-19 testing locations.
- Clean and disinfect area where the student/staff member was located.

#### HEALTHCARE PROVIDER (HCP) EVALUATION FOR COVID-19 (can be in-person or by video/telephone as determined by HCP)

COVID-19 diagnostic testing includes molecular (e.g., PCR) or antigen testing for SARS-CoV-2, the virus that causes COVID-19. Diagnostic testing may be performed with a nasopharyngeal swab, nasal swab, or saliva sample, as ordered by the health care provider. If there is a high suspicion of COVID-19 based on symptoms or circumstances, the HCP or public health should consider following up a negative antigen test with a molecular test which is more sensitive, particularly when there are important clinical or public health implications. Serology (antibody testing) cannot be used to rule in or out acute COVID-19.

September 2020 | C-2

NOTE: the time period is now 10 days for isolation.

## FOR ADVISORY PURPOSES ONLY
