Vestal Hills Elementary School closed September 29, 2021

Vestal Central School District made the decision to close Vestal Hills Elementary today, Wednesday, September 29, 2021, on a precautionary basis due to an elevated carbon monoxide reading in the building. The issue is being investigated by the District's Facilities & Operations staff.

The Vestal Hills Elementary principal was able to notify families as some students were still being transported and other families kept their children home. Students were returned home unless a parent or guardian was not there to receive them, in which case they were taken to the African Road Auditorium and supervised until they could be picked up by a parent/guardian.
